**SKILLS** React, Redux, JavaScript, Node.js, Express.js SQL, Git, HTML5, CSS3, Python, Flask, SQLAlchemy

## PROJECTS

**Amazon Clone** (Python, React, Redux, HTML5, AWS, CSS3, Flask, and, WTForms)

[Live Site](#) | [Github](#)

*A full stack Amazon clone. You can sell, purchase, or review items.*

- Developed robust image upload feature using AWS S3 for improved scalability, and cost-effectiveness of the application's storage.
- Implemented a dynamic shopping cart feature utilizing a reducer method to calculate real-time totals, enhancing the shopping experience.
- Utilized React Simple Slider to recreate an engaging carousel experience, similar to Amazon's user interface.

**Spotify Inspired** (Python, React, Redux, HTML5, AWS and CSS3, Flask, WTForms)

[Live Site](#) | [Github](#)

*A full stack Spotify clone, named Spotipy. You can create albums and playlists, listen to songs, and search.*

- Collaborated with two developers utilizing Git version control system, effectively managing the codebase and facilitating seamless teamwork for project development.
- Implemented polymorphic tables, a powerful database design technique, enabling dynamic and adaptable data structures that promote scalability, code reusability, and efficient storage utilization.
- Created a dynamic dropdown list to add a song to a playlist, displaying available playlists only if the song isn't present.
- Incorporated Redux with HTML5 media web components to develop personalized media playback functionality.

**AirBnB Inspired** (Javascript, Express, HTML, and CSS)

[Live Site](#) | [Github](#)

*A full stack AirBnB inspired website, Vacation Spots. You can review, reserve, or host a spot.*

- Designed and integrated a comprehensive review system, allowing users to provide feedback and ratings for spots.
- Utilized React's dynamic components to display different user interfaces based on authentication, enhancing user experience.
- Implemented a function to prevent overlapping bookings, improving scheduling accuracy and system integrity.

## EXPERIENCE

**Willamette Dental Group, Operations Analysis** Hillsboro, OR

May 2022-Current

- Spearheaded company-wide adoption of a digital intake form, reducing new patient lobby wait time by 3 minutes.
- Collaborated internally to design and implement a comprehensive form in our EHR system, capturing all necessary information.
- Developed and Deployed a scoring SharePoint form for external consultants. Implemented advanced logic to calculate the total and return a letter grade.

**Willamette Dental Group, Administrative Assistant** Hillsboro, OR

Aug 2019-May 2022

- Conducted daily audits of schedules for 6 General dentists, implementing modifications based on trends resulting in a 7.32% increase in patient access.
- Coordinated paid time off and leave of absence for 40+ employees while maintaining recommended staffing ratios.
- Analyzed company strategic goals weekly and created action plans with stakeholders when necessary.

**Willamette Dental Group, Regional Operations Specialist** Tigard, OR

Jan 2019- Aug 2019

- Created and executed a comprehensive "Power Outage Survival Guide" to ensure exceptional patient care during power outages.
- Assisted clinic managers in defining and achieving site-specific goals and objectives for 12 offices.
- Collaborated with a team to develop and deliver a training session at an all-managers meeting, facilitating a smooth transition from Kronos to UGK and ensuring all users were proficient in navigating the system.

## EDUCATION

**App Academy** Remote

2023

- Completed an intensive 1,000+ hours online program focused on full-stack software development with a <3% acceptance rate.
- Collaborated with peers on team projects, fostering effective communication and teamwork skills.
- Mastered multiple programming languages, frameworks, and tools essential for creating robust and scalable websites.
- Demonstrated expertise in developing RESTful APIs to enable seamless communication between front-end and back-end systems.
